ABSTRACT

An abstract is required. It should state clearly the objectives of the study and should present salient conclusions in approximately 50 words.

INTRODUCTION

This manual has been prepared in the format that should be used for the preparation of manuscripts.

The Proceedings from this UEF Conference will be prepared from camera-ready copy received from authors. All copy must be clearly and accurately prepared on a word processor on good quality, plain, white paper. Use either 8.5"x11" or international A4 paper.

Margin settings will depend on your word processing program and paper size. Imagine a "box" that would contain *any* element of your paper that should be reproduced (text, figures, tables, captions): the width should not exceed 5.75" (14.5 cm) and the height should not exceed 9" (22.5 cm). Try to "fill" your imaginary "box" on each page. Leave at least 1" (3 cm) top and bottom margins.

Use a letter quality or laser printer. All text must be single spaced. Arial 11 has been used in the body of this document and Arial 14 bold for the title. Please use a similar font. Double space between paragraphs.

MAJOR HEADINGS

Major headings are typed in bold capitals. They start at the left-hand margin on a separate line. Skip a line above and below any major headings.

Secondary Headings

Secondary headings are typed in initial capitals (bold), start at the left-hand margin and on a separate line. Skip a line above and below secondary headings.

FIRST PAGE OF MANUSCRIPT

Place the title of the paper on the first page of the manuscript two inches below the top of the page. Use bold capitals for the title with the size of the lettering slightly larger than that in the text.

The full name(s), current employment, including address of the author(s) must be given below the title. An abstract of the paper and the start of text should appear on the first page.

FIGURES AND TABLES

Pertinent, clear illustrations enhance an article and often save words. It is imperative that all drawings and all lettering on illustrations be checked with great care before submission. Drawings should be done on the computer or be made on white paper with black waterproof drawing ink and mounted on the numbered page where they are to appear in the text. Glossy photographs of drawings or charts are preferred if you have not used a computer to generate them. Otherwise, the original art work must accompany the manuscript.

PHOTOGRAPHS

Only absolutely essential illustrative photographs should be used. Because reproducing photographs is expensive, they must be kept to a minimum. For proper reproduction, photos should be clear, glossy, black-and-white prints, with good contrast. Since photos are reproduced by a process sensitive to markings and creases, avoid marking on the face of the photo, writing or typing on its back, bending or folding, or using paper clips, tape or staples. A figure number and the author's name on the border are all that is necessary.

Please note that if a figure or photograph has been published previously, it will be necessary for the author to obtain written approval from the original publisher for the United Engineering Foundation to reprint the figure or photograph. A sample form is enclosed.

TRADE NAMES, CORPORATE NAMES AND PERMISSIONS

To denote proprietary items, use the initial cap, upper case: Teflon, Ivory, Xerox

To denote companies who have an acronym as their name, use the same approach: Abacor, Tytel, Exxon. There are instances where initials make up a company name, and we use those: NL Industries.

SYMBOLS AND ABBREVIATIONS

Use only standard symbols, abbreviations, and units of measure in text and illustrations. Symbols used through the paper should be listed under the major heading **NOTATION** and should follow the **ACKNOWLEDGMENT**, but come before **REFERENCES**. These should not be inserted into the body of the report.

REFERENCES

List and number all bibliographical references at the end of the paper under the major heading **REFERENCES**. When referring to them in the text, type the corresponding reference number in parentheses, and underline it, e.g., Smith and Jones (1). Make certain to underline this number. Number the references in order of appearance. Do not double space between each reference. When there are three or more authors, use *et al* in the text, but not in the References list.

Writers are cautioned to give complete information about books and authors and to check spelling and dates carefully before submitting the mats.

KEY WORDS

Please provide a separate sheet with a listing of approximately ten key words that should be used to index the paper.

TRANSFER OF COPYRIGHT

The enclosed Transfer of Copyright must be completed by the author and submitted with the manuscript. No paper can be included in the Proceedings unless a Transfer of Copyright form has been received at the United Engineering Foundation.

LENGTH

We will return any paper that exceeds the number of pages (including text, tables and illustrations) established by the conference chair.

DELIVERY

All manuscripts (the original and one photocopy) must reach the individual designated by the conference management prior to the deadline that has been established for the receipt of manuscripts.

MISCELLANEOUS

Should you have questions about items not mentioned, first check the conference proceedings area of the publications section on the ASCE website (www.asce.org) as the Foundation will accept their answers to questions posed.
